

CATALOGO | 2023

ESTAR

375

En esta sección del catálogo, presentamos aquellas colecciones que identifican los salones, con sofás, butacas, mesas de compañía, cojines y accesorios para crear ambientes y decorar esos puntos de encuentro donde disfrutar cómodamente del tiempo con familiares y amigos.

COMEDOR

76206

Una comida es la excusa ideal para organizar una reunión informal, para celebrar un día especial, o simplemente para disfrutar de un buen manjar. Los comedores que presentamos son para esa comida al aire libre.

RELAX

207266

Es hora de alejarse de la rutina, ya sea solo o en compañía, de leer un libro, de relajarse con una buena música, o descansar en busca del silencio...
Nuestras colecciones y accesorios de relax invitan a ello.

ILUMINACION

267290

Una amplia gama de lámparas lista para iluminar, decorar y seguir disfrutando de ese espacio exterior de la vivienda.

ALFOMBRAS

291299

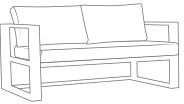

El elemento decorativo que da el toque de distinción a nuestra terraza.

CERÁMICA
Es un proceso de fabricación totalmente artesanal, empezando por el tratamiento manual del barro, secado del mismo, decoración con esmalte de color, barnizado y posterior cocción, dando un resultado prácticamente único de cada pieza, con el sello de calidad de Cerámica de La Bisbal y reconocido por la Unión Europea.

PADERE

A photograph of a woman with blonde hair, wearing a green sleeveless dress, standing barefoot in shallow water. She is holding a small, square, black lantern with a warm light. The background shows a calm body of water and a distant shoreline with trees and buildings under a soft sky.

PARC

A photograph of three square, black lanterns with warm lights inside, placed on a wooden deck at night. The background shows a dark body of water and a distant shoreline.

ALFOMBRAS

Todas nuestras alfombras están tejidas a mano y confeccionadas con material reciclado. El material elegido para la confección es el polipropileno. Este, proporciona un acabado totalmente orgánico gracias al minucioso tratamiento que se le brinda a sus filamentos. Además, poseen gran versatilidad ya que pueden ser utilizadas tanto en interior como exterior.

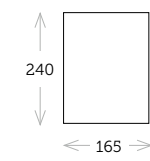

La alfombra ARENA reproduce de forma sutil el gradiente de color que sufre la arena de la playa cuando la recorre el agua del mar

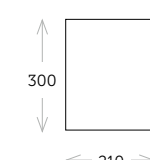

alfombra rectangular polipropileno reciclado

195.XL300.BG

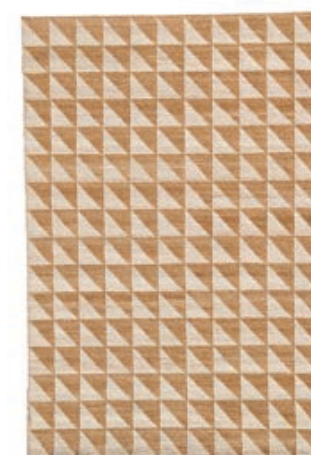

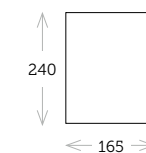

ARENA

Las alfombras CUINA se apropian de los elementos del tradicional azulejo de cocina ampurdanesa. Estos elementos tradicionales están formados por un cuadrado esmaltado y dos triángulos de diferentes colores. Logrando texturas geométricas variadas ya que cuentan con distintas orientaciones y patrones.

MASIA

Nuestra colección FANG está inspirada en los artesanos catalanes y en ella renovamos un tradicional acabado de la cerámica ampurdanesa. Dicho acabado consiste, en sumergir en esmalte un extremo de la pieza de barro para dar un punto de color. Así, reproducimos simbólicamente esta tradición, al empapar en color un extremo de la alfombra.

MANTENIMIENTO RECOMENDADO

Para todos los muebles presentados en nuestro catálogo recomendamos

Limpiarlos con regularidad, principalmente antes de guardarlos. Evitar los productos químicos agresivos y el uso del agua con una presión alta.

Para una adecuada limpieza se puede utilizar un pulverizador de agua (baja presión), un paño que no deje pelusas, un cepillo de cerdas suaves o simplemente un aspirador para eliminar suciedad suelta.

Además sugerimos que, aproximadamente cada 6 meses, se revisen piezas de trabajo como; bisagras, tornillos, pernos, etc.

Nota: Es muy importante evitar que el agua de lluvia se acumule en los muebles. Si esto ocurre, hay que inclinar los muebles de lado, para drenar el agua de piezas interiores y mecanismos.

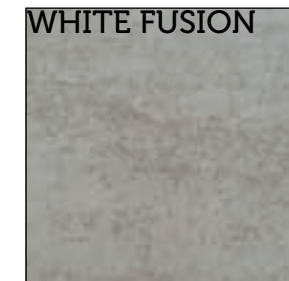

MATERIALES CRISTAL

Empleado como encimera de mesa de nuestras colecciones: **ADELE, BELLUNO, DANUBE, FANO, GALLIS, NEVERLAND, SLIDE, SPADE, THEMIS, THOR, UNA y VERONA.**

El cristal que utilizamos es un vidrio templado que otorga gran seguridad y se presenta en un acabado mate, grabado al ácido, consiguiendo un hermoso aspecto traslúcido. La limpieza periódica es el único mantenimiento recomendado.

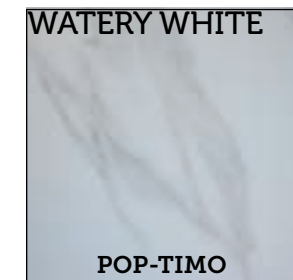

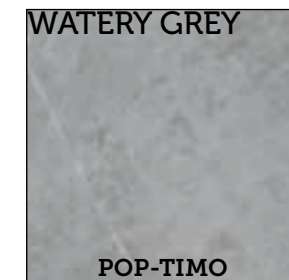

En nuestra colección **SLIDE**, a dicho cristal se le proyectan superficialmente a alta presión pequeños cristales porcelánicos para obtener el aspecto de una superficie cerámica.

PORCELÁNICO

Utilizado como encimera de mesa en nuestras colecciones: **FERMO, NEVERLAND, POP y TIMO.**

El porcelánico es una lámina de mineral altamente resistente al fuego, al impacto, al rayado y a la humedad. Además, son totalmente higiénicas e íntegramente ecológicas.

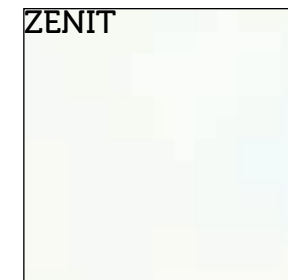

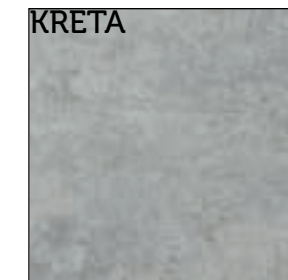

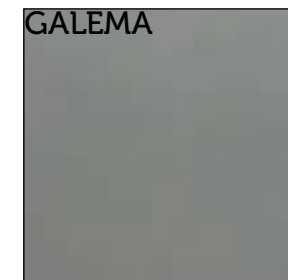

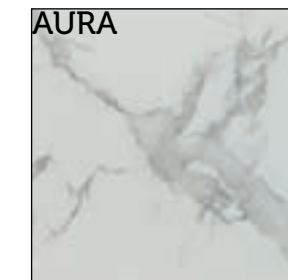

DEKTON

Utilizado como encimera de mesa en nuestras colecciones: **DUNA y TEN.**

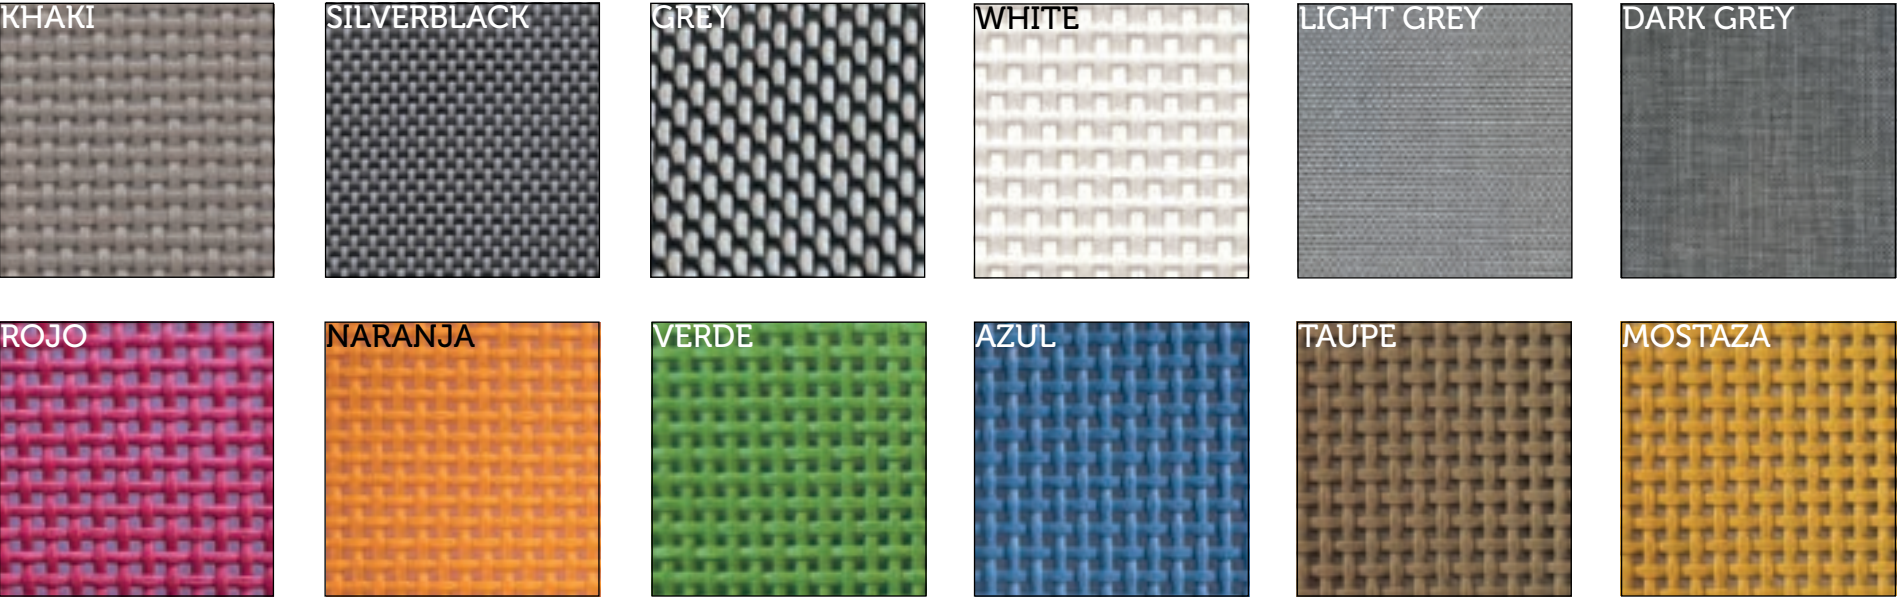

Dekton® es una sofisticada mezcla de las materias primas que se utilizan para fabricar vidrio, porcelánicos de última generación y superficies de cuarzo. Es un material resistente a las manchas, a los rayos UV y además es incombustible. Fácil limpieza con agua y jabón neutro.

Nota: En caso de manchas agresivas, utilizar detergentes en crema con partículas abrasivas o disolventes tipo acetona.

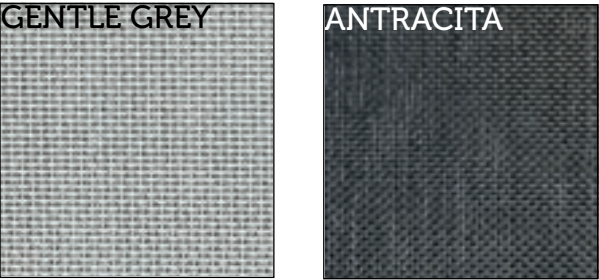

SLING

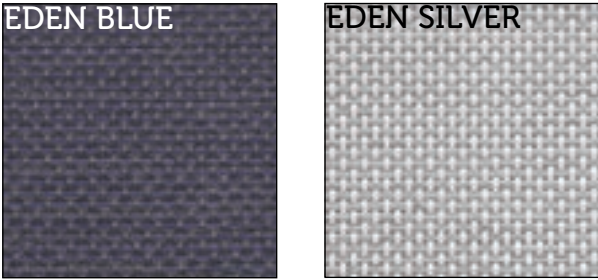

Es un tejido de PVC de trenzado industrial, sometido a unos estiramientos previos para mantener la tensión una vez aplicado al mueble. Es transpirable, permeable pero resistente al agua y a los rayos UV. Una periódica limpieza como protección, es suficiente.

En nuestras colecciones CALIFORNIA, LISBON y ONTARIO, también usamos el sling mezclado con olefin.

En nuestra colección MAREA, también usamos el Batyline ®

MATERIALES

ALUMINIO

El aluminio que ofrecen nuestras colecciones cuenta con un acabado a base de pigmentación y pintura al horno texturizada, que lo protege de la decoloración ante los rayos UV. Esto permite un óptimo comportamiento en el exterior, por su resistencia, ligereza y antioxidación. Una limpieza periódica es el único mantenimiento que requiere este material.

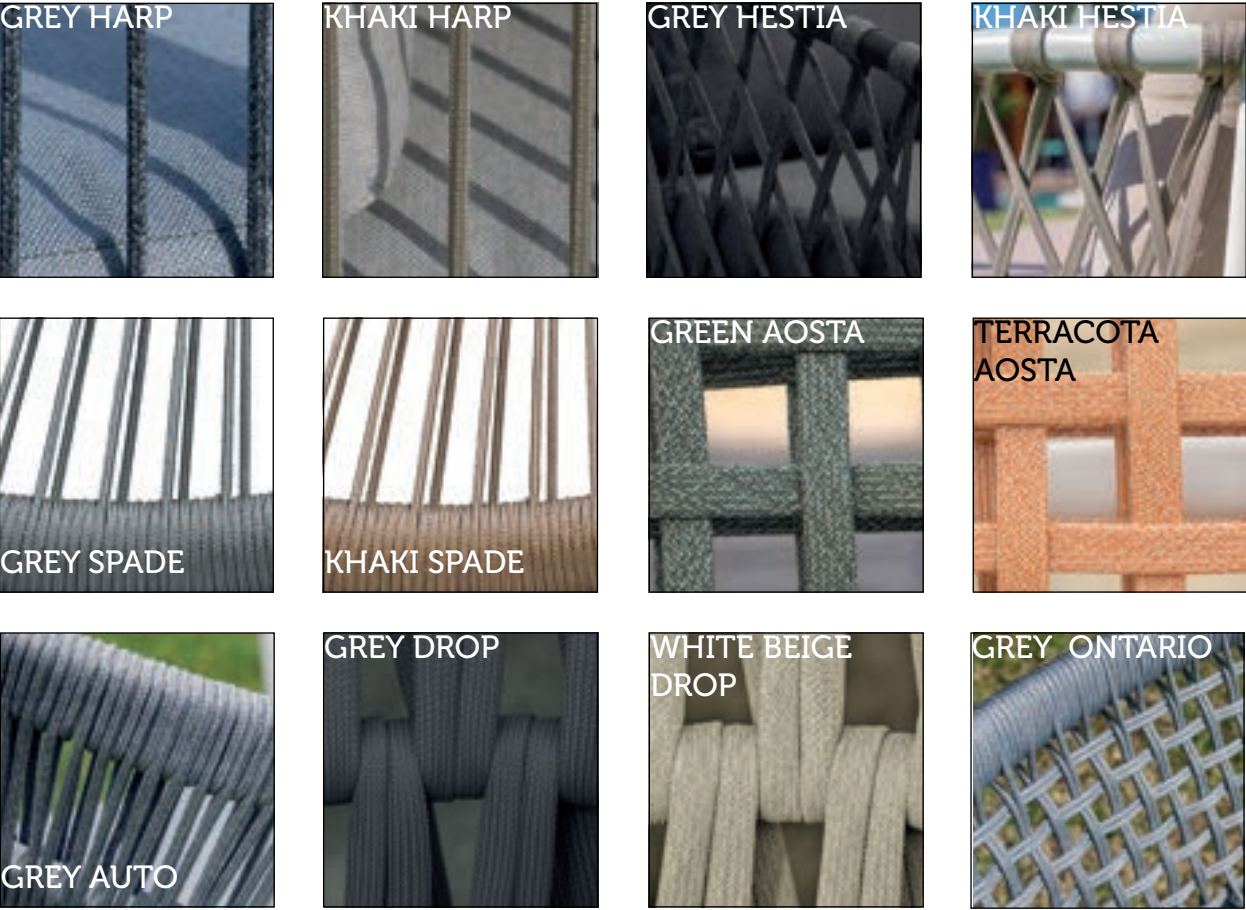

WICKER

Es una resina, trenzada a mano ideal para uso exterior, que consigue unos acabados realmente muy cercanos a los productos más naturales como el mimbre. Una cuidadosa limpieza y protección, ante posibles cambios extremos de temperatura, son recomendables para su buen mantenimiento.

ROPE

Es un tejido plástico, trenzado a mano, obtenido mediante polimerización de olefinas y muy resistente al exterior. Fácil limpieza con agua y jabón neutro.

POLIETILENO

Utilizado en nuestras colecciones de bases de contract POT y de iluminación BOB.

Cada pieza es sometida a un proceso de rotomoldeo que consiste en una transformación del plástico por medio de calor y movimiento, a través de un molde. El PE de alta densidad se presenta en partículas, que se funden (por temperatura en un horno que se esparcen) y se adaptan a la forma con la que ha sido diseñado el molde. Dicho molde, es texturado y teflonado para dar un acabado rugoso al producto.

Nota: Nunca utilizar para su limpieza productos industriales como, por ejemplo, el limpiacristales. Se recomienda utilizar agua y jabón neutro.

TABLERO COMPACTO

Utilizado como encimera de mesa en nuestras colecciones: CONTRACT y UNA.

Está compuesto por un núcleo de fibra de celulosa termoendurecida e impregnada en resinas fenólicas. Además, cuenta con una superficie exterior también impregnada y prensada a alta temperatura alta de 150º con una presión de 90 kg/cm². Esto les confiere una alta resistencia a los agentes atmosféricos. Fácil limpieza con agua y jabón neutro.

MADERA DE TECA

Utilizada en nuestras colecciones de mobiliario: ALP, CASTOR, CESANO, DANDY, ESSENTIAL, FERMO, HARP, LARGO, LAZIO, MANHATTAN, POSITANO, TER y TIMO. También en iluminación BLOC, LUX y SPARK.

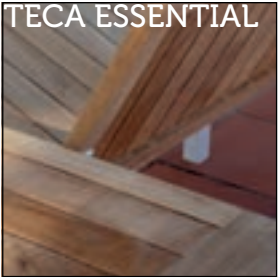

La madera de teca es una de las maderas más valoradas, tanto por profesionales como por consumidores. Esto se debe a sus características de bonita apariencia, fácil trabajabilidad y su gran durabilidad entre otras. Su albura es de color amarillo claro y tiene un duramen que presenta tonos marrones y dorados. Es una madera que envejece realmente bien, ya que su color mejora con el tiempo. Generalmente presenta una fibra recta, aunque en ocasiones puede ser ondulada. Posee un grano grueso, con una densidad aproximada de 690 kg/m³. Es muy resistente a la humedad y al ataque de hongos e insectos gracias a sus aceites naturales. Como agregado, el grano de la madera puede elevarse, produciendo pequeñas fisuras, debido a la contracción o expansión de dicho material. Esto ocurre por la meteorización inicial al exponer el mueble a los agentes atmosféricos externos, aunque en breve se estabiliza. Para su limpieza recomendamos una solución suave de cuatro partes de detergente (para ropa o jabón para lavar la vajilla) en una parte de lejía en agua.

Nota: No se recomienda engrasar la madera ya que podría causar moho o coloración irregular. Tampoco el uso de barnices o selladores de agua.

MADERA DE TECA RECICLADA

Utilizada en nuestra colección KENYA.

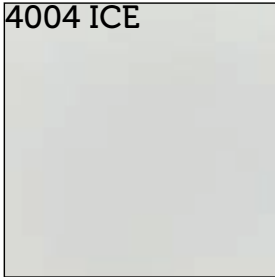

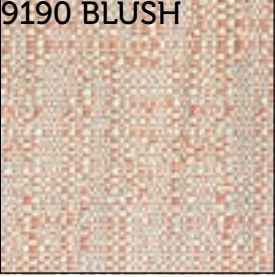

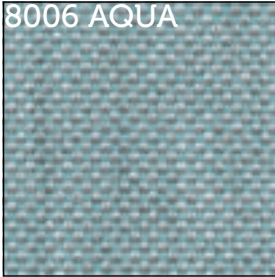

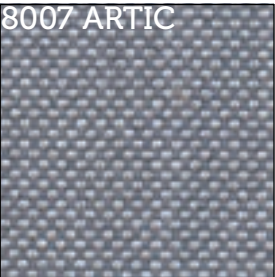

Es una selección de madera de teca que proviene de estructuras de antiguas viviendas, la cual ofrece un aspecto mucho más rústico.

TEJIDO

AGORA Es un tejido 100% acrílico de densidad 280gr/m², tintado a la masa y con tratamiento teflón para exterior. Esto permite una alta resistencia a la humedad y a los rayos solares. Se recomienda lavar a temperatura máxima de 30º con jabón neutro.

Nota: No utilizar disolventes, detergentes abrasivos, secadora ni lavado en seco. Planchado máximo a 150º.

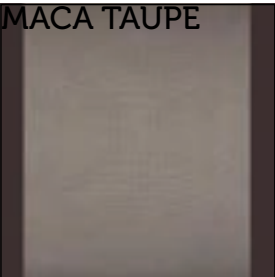

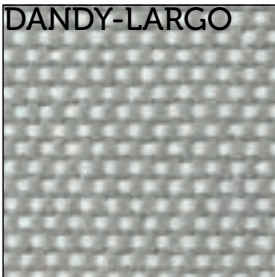

LES TOILES DU SOLEIL

es un tejido creado artesanalmente, enrollando los hilos paralelamente entre si y bajo la misma tensión, en cierto orden para formar un dibujo.

OLEFIN Es un tejido fabricado con hilo de polipropileno que se caracteriza por su gran solidez a la luz.

POLIESTER Es un tejido hecho con una fibra sintética con alta tenacidad y durabilidad al medio exterior.
